PERSONAL STATEMENT

As recent graduate from Metropolia University of Applied Sciences, with Bachelor degree in Media Engineering, I have undertaken several internships within leading organizations such as Dooxe Oy and Metropolia UAS. These placements have enabled me to develop not only specific web-development industry experience, but also a valuable and transferable skill set in this fast-paced sector. During placement with Dooxe, I worked as a web-developer contributing to projects such as Korjausurakka and managed my own research leading to my Bachelor Thesis. Furthermore, on both placement I practiced agile software development methods. Utilising excellent communication skills, I developed and maintained successful working relationships with all the staff on both occasions.

OBJECTIVE

Looking to secure a position in a web-development organisation, where I can bring immediate and strategic value and develop current skill set further.

WORK EXPERIENCE

Dooxe Oy, Helsinki
Web developer

June 2012 — September 2012

- Performed server side coding using PHP.
